

PocketAlchemy Product Overview - v0.0.alpha

Cody J. Weaver

Dec. 12th 2023

Initial Product Overview

PocketAlchemy is an Android application intended for storage of recipes for home cooks. Not simply a database though, PocketAlchemy will provide users with utilities that use their recipes. So they can spend less time making shopping lists for recipe ingredients and tracking recipe nutrition.

Android Studio and Kotlin will be used for development. PocketAlchemy will be stored here. Versioning will start at version name v0.0.alpha. See features list for list of intended features as of v0.0.alpha.
