

# PocketAlchemy - v0.1.alpha Notes

Cody J. Weaver

Dec. 31th 2023

Version 0.1.alpha is the second named version of PocketAlchemy. It represents a significant leap from 0.0.alpha. The addition of Firebase means

0.1.alpha includes authentication for users via anonymous logins. In addition, Firebase Firestore is used as a solution for data persistence. Hilt is used for dependency injection. In addition to the planned features for 0.2.alpha, development will focus on general UI polish.
